

Roof Assembly

Please note: we do recommend to glue all joints as well as nails, the glue is not included in the roof kit.

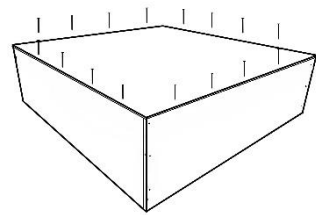

1. Using the grove nail together the four side walls using the nails provided,

2. Nail the four head space laths around inside of roof in a locking position as shown, flush with top of the side walls, using nails.

3. Nail the top board to the frame.

4. Place the metal cover on the top and nail the cover to the frame using the small nails provided.
